

Welcome to HRT, HGH & Testosterone Replacement Therapy

Thanks again for contacting me and for your interest in HRT (Hormone Replacement Therapy). My name is Mark Hilton and I am your personal health executive.

BHRT Medical Solutions has access to a network of board certified Medical Doctors in every State and County in the United States for getting you started with the required blood work and physical exam in a single convenient appointment.

Our Medical Institute provides medically approved HRT (Bio-identical Hormone Replacement Therapy) programs. We specialize in Hormone Replacement Therapy for adult men or women over the age of 30 who have symptoms of Andropause, Menopause, or Adult Onset Human Growth Hormone Deficiency (AGHD).

The question you need to ask yourself is do you qualify?

Do you, have or suffer from any of these Symptoms?

1. Low energy levels or loss of muscle strength;
2. Slow healing and recovery;
3. Sleep problems or fatigue during the day;
4. Mood swings, memory problems and/or mental clarity issues;
5. Slow muscle recovery;
6. Weight problems (too much or not enough) ;
7. Loss of interest in sex or low libido;
8. Other chronic or persistent medical problems associated with aging.

If you suffer from any (one or more) of these symptoms, you would be a potential candidate for Hormone Replacement Therapy.

Note: We do not provide HRT (Hormone Replacement Therapy) for bodybuilders or professional athletes looking to use the bio-identical hormones for sport performance enhancement.

We only provide our HRT health & wellness programs for people who have genuine medical needs and who genuinely & legitimately would like to overcome any of the health or medical issues caused by hormone deficiency, some of these items are listed above in our "Do you have any of these Symptoms?" section, some of the symptoms not mentioned above may be symptoms of premature aging that you are experiencing. Please call us to discuss these issues.

Whether you are new to the Hormone Replacement Therapy Process, or looking for a superior quality clinic to carefully oversee your HRT therapy, BHRT Medical Solutions is the right place to optimize your quality of life. Our board certified Medical Doctors will review your individual case, discuss your options with you, and develop a customized HRT, HGH or Testosterone Therapy programs to put you back in the right direction for regaining wellness and vitality in your life!

Physician-guided Growth Hormone Therapy is approved for use by adults over age 30 in the United States. But remember, although most HRT (Bio-identical Hormone Replacement Therapies) are generally safe, non-toxic and have no significant adverse side effects to approved therapies, it is not always the right choice for everyone.

Warmest Regards,

Mark Hilton, MSIS
